

Work is scheduled to begin Monday, July 15, on a cold mill and hot mix maintenance project north of town.

The project will start approximately four miles north of Imperial on Highway 61 and continue for approximately four miles north. The maintenance work will consist of cold milling the existing 24 feet of the roadway and replacing, then repaving with hot mix.

Speed limits will be reduced until completion of project. Travel through the project will be maintained, using flaggers and a pilot vehicle with delays expected to be minimal.

It is anticipated the project will be completed by Aug. 7.
