

T J Martin of Lamar, owns three bulls listed in the Spring 2009 Sire Evaluation Report published by the American Angus Association® in Saint Joseph, Mo.

Issued in both the spring and fall, the new report features the latest performance information available on 5,175 sires, and is currently accessible at www.angussiresearch.com.

“This report provides both Angus breeders and commercial cattle producers using Angus genetics with accurate, predictable selection tools for improving their herd,” says Bill Bowman, American Angus Association chief operating officer (COO) and director of performance programs.

Expected Progeny Differences (EPDs) are generated from the performance database of the American Angus Association, which includes information submitted by nearly 9,800 Angus breeders this past year through the Association’s Beef Improvement Records (BIR) program.
