The students of seventh and eighth grade science teacher Kim Wilson will be displaying their science projects at Chase County Schools Friday, and the public is invited to view them.

The students will be displaying their projects on boards around the indoor walking track in the Longhorn Gym from about 8 a.m. to 2 p.m.

The students will also be giving presentations to judges, who will then determine the top 10 winners in each class.

Awards will be presented at 3 p.m. in the school auditorium. Those winners will attend a science meet in North Platte in March.
